“ Your mother was a very special lady. She was our teacher in my senior year (1971) for a cooperative class, where class was held 7 a.m.until noon, then each student went to a job to practice what we learned in class. I remember being so frightened to be in her class because I had heard she was VERY tough (someone actually called her "The Dragon Lady"! ). But I loved her from the first day because she made me feel special. I was extremely shy and had no confidence, but she wouldn't let me get away with that. She called on me all the time to read back my shorthand notes in class and even signed me up to participate in a tournament, where I bombed on the first spelling word because I was SO nervous (I can still hear myself spelling trophy "T-R-O-F-Y"! ). She WAS a tough teacher, but she brought out the best in me. Her dry sense of humor always made me laugh out loud -- many times I was only one in class who seemed to "get it". But one of my fondest memories of her was when she said, "You remind me of my daughter, Kim." At that moment, I knew she had given me the highest compliment she could. There are many who owe her a huge debt of gratitude for giving them a solid start in business and life, but perhaps none more than me. Thank you for sharing her with us. Angela Fielder
